

Comprehensive Training Solutions When Lives Are On The Line

FOR IMMEDIATE RELEASE

Homeland Security Scenarios for PRISim™ Simulators Now Available

Provides realistic training on wide range of security-related situations

SEATTLE – October 1, 2004 – Advanced Interactive Systems, Inc. (www.ais-sim.com) has announced the release of the Homeland Security Disc 1 for use with PRISim™ judgment training simulators. This newest set of scenarios recreates homeland security situations experienced worldwide in the past few years and are highly relevant for the current training curriculum for airport, law enforcement, military, and security personnel.

Each of the six scenarios can change mid stream by the instructor depending on the students judgment and ability to handle the situation, this will provide a multitude of results and make each training session impossible to memorize. The Homeland Security Disc 1 includes:

- High Risk Vehicle Stop
- Detonated Package
- High Risk Motorcycle Stop
- Suspicious Package
- VIP Movement
- Reaction training

Included in this new release is a new set of reaction drills to reinforce behavior recognition and threat assessment versus prejudice of situations.

“The Homeland Security Disc is an exceptional recap of what law enforcement is facing on a daily basis and addresses individual security issues,” says Greg Hoover, Director of Training, “Since 9/11, it’s been shown that law enforcement, military, and security personnel are in need of the type of training that is provided via this software.”

The PRISim™ judgment training simulator, featuring the Homeland Security Disc 1 scenarios, will be available for hands-on demonstrations at the International Association of Chiefs of Police Conference in Los Angeles, California, November 13-15, 2004.

About AIS

Advanced Interactive Systems, Inc., provides comprehensive training solutions for people in positions where lives are on the line, including aviation, law enforcement, military, government, security, corrections and emergency responders. AIS builds PRISim training simulators that provide lethal and less-lethal weapons handling and judgment skills. The AIS Ltd. group designs and builds anti-terrorist and other special application training facilities for military and special operations groups, with installations in more than 60 countries. The Reality Response Division manufactures interactive simulation systems and synthetic environments that provide reality-based training for CBNRE (Chemical, biological, nuclear, radiologic, explosive) hazard response tasks. NASS, a wholly owned subsidiary, provides counterterrorism and security planning. Headquartered in Seattle, AIS is a privately owned company with offices in Washington D.C.; McLean, Virginia; Monterey, California; Orlando, Florida; Abu Dhabi, United Arab Emirates; and London, England.
