

CONTENT AUTHORING

*"Highest level of customized
situation training available."*

Give Your Judgment Trainer the Extra Edge

Custom-tailored situations add value to your PRISim Suite® training system by allowing you to create content that fits your training needs. Gain even more return on a great investment by giving your training the ultimate in flexibility. With the PRISim Suite Content Authoring System, you take creative control over your training situations. Our open architecture allows you to incorporate familiar environments and mission-specific sequences into your training.

PRISim Suite Content Authoring System

Combined with PRISim Suite, the Content Authoring System provides effective situation building and editing capabilities, including:

- Professional-level audio and video editing
- Off-the-shelf Adobe® software
- Create premium content and broadcast quality digital video situations with the same equipment and tools used by AIS
- Output HD MPEG2 quality video

With the proprietary AIS Branching Tool, you can define multiple levels of scenes or branches for the situations you create, giving you complete control over the complexity of your training.

Professional Range Instruction Simulator Suite™

PRISim Suite Content Authoring System

Purchase this system as a standalone unit or integrated into your PRISim Suite training system. With professional-level audio and video editing available from off-the-shelf industry standard Adobe® software, you can create premium content and broadcast quality digital video scenarios with the same equipment and tools used by AIS. Optional classes and equipment, such as camcorder, tripod, and video tape recorder, are also available to support your production needs.

PRISim Suite Content Authoring System

Content Production Kit

The Content Production Kit provides all of the necessary video equipment to record accurate branching situations for the PRISim Suite Judgment Trainer. The primary components are a professional quality tripod, portable Mini HD DV VTR with LCD monitor, Mini HD DV Camera, and all necessary cables and batteries. All components come packed in a hard case for easy transport and protection of your equipment.

Three Day Authoring Training

This three day, hands-on class shows you how to use our powerful authoring tools to create your own interactive training videos for PRISim Suite. Upon completing the course, you will have the fundamental skills to begin creating custom situations that meet your training requirements.

Prior to class, the AIS instructor will help you formulate a scenario idea to film during the course. Additional assistance will also be offered in choosing an ideal filming location for the training objective, as well as determining the actors and props necessary to make your scenario as realistic as possible.
